

BLACK

Threats to progress? Most significant areas for development? Pitfalls? Hardest things to tackle?

ALASTAIR ROSS MAR 01, 2022 01:00PM

Preparation can be very time consuming if you are not familiar with the software or topic you need to teach.

Not having the software/ resources

I am not sure what kind of paperwork I should have regarding Computing in terms of planning as we using a scheme.

Not having a reliable enough infrastructure?

Computing being dropped to cover other subjects.

Staff not having enough knowledge on how to deliver lessons surrounding certain programs.

Not feeling confident to give support in older years

Not having the knowledge and experience of all the different topics, programs we use.

Assessment

I find it hard to assess strands of work in single format

Being able to keep track of pupils progress/marking

I find I spend more time than I would like dealing with technical issues.

Not having time to teach computing effectively

Staff lacking confidence in teaching computing.

Optional: Type a Subject (Above the hexagons)

- o Click on the plus (bottom right)
- o Share your thoughts below the hexagons.
- o Highlight text to format it, including adding bullet points!
- o Drag a comment down or to the right if there's no room.
- o Zoom out with your browser to see more comments!
- o "Like" other people's thoughts if you share them!
