Invent.
Make.
Create.

Maker Challenge Programme

**Think of something you'd like to make or build.
Now imagine you've got everything you need
to bring your creation to life...**

We're on the lookout for the next group of Maker Challengers to join us at our brand new Dangoor Reach Out Makerspace.

Over several sessions, you'll work in our workshops in The Invention Rooms to invent and build something new and compete to win a prize. You'll learn to use new equipment like 3D printers and laser cutters. There are also arts materials like paper, cloth and paint for you to use.

If you're up for the challenge, apply online via the Maker Challenge Programme website.

All Maker Challengers must be aged between 14 and 18 years old during their time on the programme.
