

SCHOOLS REINVENTING LONDON

Minecraft Education and [C40](#) are teaming up with the Mayor of London to empower student voices through [Schools Reinventing Cities](#). This program presents a unique opportunity for educators to inspire students from primary to high schools to use their creativity and voice to design sustainable solutions to combat climate issues that threaten the future of their city.

We want to inspire young Londoners to learn more about the built environment industry, highlight the types of careers that are available to them and to get them thinking about making the city that they go to school in more sustainable for their futures.

This year, the Mayor of London is challenging ALL students of London to be creative, have fun and design their Minecraft Education solution to this question:

“How can we reimagine Croydon town centre to make it a greener, safer and/or a more prosperous place for everyone?”

Launch Date

January 23rd

Submissions Due

April 24th

Email us at DesignChallenge@london.gov.uk - let us know your name, your role, your school, how many students you may want to enter the competition.
