

Workshop for Early Years Professionals

Supporting Parents/Caregivers on the Toilet Training Journey

“Toilet Training” implies that as Parents/Caregivers they have to teach their children – and that the success or failure falls on them.

“Toilet Learning” acknowledges the child’s part in the process and also takes into account that it usually occurs over time, not all at once.

.....but what a responsibility it is!

As adults we may talk about “going to the toilet” as though it were one easy step. In reality there are several steps involved as we explore in our **INSPIRE Parent/caregiver Toileting Program**.

Join INSPIRE staff to learn what the *Parent/Caregiver Training program* includes and how **Early Years Settings can work in partnership with Parents/Caregivers** to support the Toilet Training Journey
