

The Creighton Centre

A small charity with a big impact

Safer Homes

Keeping children safe at home

Every year 40,000 children under five are admitted to hospital after having an accident at home. Safer Homes can help families in H&F make their homes safer for under fives and all children with disabilities. We carry out home safety assessments and provide advice, literature and equipment, which we fit. This can include stair gates, cupboard catches and window restrictors.

This service is completely free to families on means tested benefits. All our staff are fully trained and DBS checked.
